President de Kiewiet Given Historic Martin B. Anderson Desk

Although the mystery of its disappearance from Anderson Hall many decades ago is still unsolved, the historic desk of Martin B. Anderson, Rochester's first president, has been returned to the University.

It was discovered, under unexplained circumstances, in the engineering department of Cornell University, where it is known to have been for some 30 years. How it got there is conjectural. It was identified by a brass plate with the inscription:

Working desk of Martin B. Anderson, LL.D., First President of the University of Rochester.

When Cornelis W. de Kiewiet, acting president of Cornell, became president of Rochester, some of his colleagues at Ithaca who knew of the desk's presence on the Cornell campus, decided that it should be presented to him and returned to Rochester. They had it restored to its original condition, and the desk, a large and handsome double-sided one of chestnut, with top and drawer mouldings stained walnut, now adorns President de Kiewiet's study at Babcock House.

When the desk arrived at his home, it was accompanied by a note from the donors, which said:

"This desk does not have the reputation of the Stone of Scone, but we want the fifth President of the University of Rochester to have it with our warmest best wishes. Please note that it is a 'working desk.'"

When the desk was removed from the Rochester campus, or by whom, it is not known. Like the famed Stone of Scone, aforementioned, which was removed from its traditional setting under the British Coronation Chair in Westminster Abbey not long ago by some Scotch super-patriots and later returned, the Anderson desk is now back where it belongs.
Education Challenged To Attack “Spirit of Fatalism”

Intellectual Fortitude Vital to Progress,
Dr. de Kiewiet Declares in Philadelphia Address

THERE must be a “grand alliance of science and the humanities” if higher education is to fulfill its responsibility in these times of national and world crisis, it is the firm conviction of President de Kiewiet.

He gave eloquent expression to his views in an address on “Our National Resources of Skill and Wisdom” at the annual meeting of the American Association for the Advancement of Science at the University of Pennsylvania on December 30.

New Thinking Needed

“I know of no more serious task for that branch of politics which we call education than to move against the spirit of fatalism which is so clearly discernible in colleges and universities”, President de Kiewiet declared. “Above all do we have need for thoughts that have never been thought before, a reassessment of our place in the world, a fresh justification of our purposes, a restatement of our political arrangements in language adequate to the living world . . . . By the side of scientists in their laboratories, technicians at their drafting tables, men at their machines, there must be a corresponding activity in the world of thought and aspiration.

Not a “Lament”

“This is not an appeal for equal treatment for the humanities, nor the lament of displaced intellectuals and academic minorities. It is a prayer that as we add to our strength we add also to our wisdom, that as we assure ourselves of sufficient armaments we also acquire a fortitude that comes from the mind and not from stubborness, or desperation or hate.

Fatalism, Cynicism Decrived

“The generation of young men whom we are planning to induct into our army of four million men possesses the grim knowledge that we have called men to battle twice only to stumble helplessly into a new world of anger and frustration. They will not accept the outbreak of a third catastrophe with the optimism of 1917 or the righteous indignation of Pearl Harbor . . . . As an historian I know that the crisis is great. As an educator I insist most solemnly that this is not a generation that will march because it is told to do so. It is a generation loaded down with the grim recognition that it lives in a shrinking prison between one disaster and the next. Are they to look forward to the great test of their lives with fatalism and cynicism? . . .

Humanities Are Basic

“If the future shape and course of American society mean as much as its present security then we must insist that education concern itself, more than ever before, with the past and future—the past expressed as achievement housed in our laws and institutions, the future conceived as the vessel containing the purposes for which we may train our students and build our armaments.

“The humanities which give a knowledge of man and an understanding of his potentialities, are the basic disciplines for today’s education. Without one of the humanities, namely a reflective and wise grasp of history, we cannot hope to hold the present sympathy of our allies, nor enter upon the opportunities of yet another peace . . . . Science and machinery give us power. It is the humanities that give us the incentive and the will. For education to
be adequate to our crisis the demand is inexorable that sufficient talent be left free to inform men with the ideas of the past, to create in them the power of comprehending the living world, and to create in them the will to command the future.

**Great Aspirations Vital**

"At the moment in our history when we are compelled to build up science and technology beyond the needs of peace, we are equally compelled to sustain the life of thought beyond the needs of war. My plea is for the encouragement, even in the midst of grave physical danger, of those activities of the mind and spirit which give an attractive and helpful aspect to our national life, now and in the future . . .

"We cannot relinquish those studies which teach that the glory of humanity in its existence on earth is its power to transcend the mere animal routine of survival, that we may aspire to become in the future that which we are not yet today, that we may produce through the grand alliance of science and the humanities that mystery over the world that will bring laughter on the faces of children, hope in the hearts of youth, and contentment in the eyes of aged men."

**Too Few Young Leaders**

The low birthrate of the depression years has produced too few young people on whom the modern crisis is placing too many burdens, President de Kiewiet reminded, and less than a million men will be available each year for military service for a whole decade.

"Their load and their sacrifice must be justified and made acceptable beyond anything so far offered", he said. He expressed the hope that "the military leadership of this country will continue to grow in its understanding of the need for a national policy of specialized manpower."

"In the armed forces, even at the very top, there still prevails too stiff an insistence that because all must serve, all must serve alike . . . The military mind has achieved a greatly increased understanding of the role of fundamental and applied science in national defense. It still shows signs of what may be called anti-intellectualism . . . But a lack of discernment of the nature and value of intellectual effort is a common military fault. At the risk of being accused of advocating that a war can be fought with the instruments of peace, I would, nevertheless, maintain that our chances of carrying our precious load of western culture through to better days would be improved if there were a more realistic understanding of the role of skill and wisdom even in an age of conflict."

**Basil R. Weston, '21, Appointed to Head 1952 Alumni-Alumnae Fund Drive Committee**

Basil R. Weston, '21, insurance agency head and prominent in the Rochester Ad Club, Chamber of Commerce and other civic groups for many years, will head the 1952 Alumni-Alumnae Fund committee for the annual drive which will begin with a dinner on April 17.

**Higher Goal Expected**

A goal of $75,000 has been set for 1952. This is a substantial increase over last year's goal of $50,000.

Miss Elizabeth Schwartz, '36, is vice-chairman. An interim committee of the new Alumni Federation will direct the fund pending the election of the federation's board of governors and the establishment of a standing fund committee.

**Active Alumnus**

Tall, personable, and energetic, Weston is known for the contagious enthusiasm he imparts to whatever activity he undertakes. Always active in alumni affairs and keenly interested in the University's progress, he has served as chairman of his class fund drive committee from the time the fund was begun, and also is life president of his class. His ties with the University are close and many. His wife, the former Helen Kies, is a 1923 UR graduate, and his daughter, Nancy Weston Kennedy, was in the Class of 1946. His brother, Gerrit Weston, is a '17 alumnus, and his sister, Margaret Weston, was graduated in 1924.

**General Insurance Agent**

He is a former president of the Rochester Ad Club, is an active member of the Chamber of Commerce, of which he was at one time assistant secretary, and general agent of the Rochester office of the Berkshire Life Insurance Company.

Presidents and chairmen of each of the six alumni and alumnae organizations comprising the federation, and their executive secretaries, also are members of the interim committee for the 1952 Fund.

**Federation Directs**

Fund solicitation will continue to use the class and school agent systems developed successfully in preceding years. Direction, organization, and tabulation will be in the hands of the Fund Committee through the central office of the Federation. As in past years, it will be the prerogative of the individual donors to determine the school or college of the University which will be the recipient of their contributions.
Three Appointed to Office of University Development

Chamber of Commerce President, Attorney,
Newspaperman To Help Explore, Orient UR Future

Work of the new Office of University Development has already moved into high gear under the direction of Dr. Donald W. Gilbert with the appointment of three able young aides. They are:

Civic Development Specialist

Andrew D. Wolfe, former newspaper man, assistant director of the office, Sol M. Linowitz, Rochester civic leader and attorney, special consultant, and Joseph C. Wilson, '31, Rochester industrialist, a trustee of the University, and new president of the Chamber of Commerce, as chairman of a lay steering committee on the development program comprised of UR trustees, alumni and alumnae, and friends of the University in the community, to advise and assist in formulating plans for future progress.

Wolfe, a graduate of Harvard University, where he received his B.A. degree in English with honors in 1946 and a master's degree in 1947, has been a member of the Rochester Times-Union editorial staff for the past four years as a reporter and editorial writer specializing in articles on civic development.

Served Overseas

A native of Pittsburgh, Wolfe is a graduate of Milton Academy, attended Harvard University from 1940-43, and returned to complete his studies after three years in military service, including duty overseas with the European Civil Affairs Division. He took part in the campaigns of Northern France, Ardennes, the Rhineland, and Central Europe.

His wife, the former Carolyn Chace Sibley, is the granddaughter of Rufus A. Sibley, a trustee of the University from 1895 to 1915, and of Benjamin B. Chace, of the Class of 1889, and the great-granddaughter of George S. Chace, of the Class of 1852.

Prominent Attorney

As special consultant, Linowitz will assist in plans to make the University a more effective community force, and his appointment marked the first step in the effort to obtain the help and counsel of community leaders who will cooperate with the faculties, trustees, alumni and alumnae.

Linowitz has been prominent in a wide range of civic activities. He is president of the City Club of Rochester, chairman of the Policy Committee of the Rochester Association for the United Nations, and serves on the boards of Oetiana Council, Boy Scouts of America; Rochester Institute of International Affairs, United Jewish Welfare Fund, JYMA and JYWA, Rochester School for the Deaf, and other organizations. In the state and national fields he is a member of the American Bar Association's Committee for Control of Atomic Energy, and of the New York State Bar Association's Committee on International Law and Committee to Cooperate with the Law Revision Commission. He is a graduate of Hamilton College and Cornell Law School.

Chamber of Commerce President

Wilson, who is president of the Haloid Company, also has had broad experience in civic, cultural and educational affairs. As head of the Chamber of Commerce, he will spearhead the new civic develop-
McKelvey Heads New Alumni Federation; Centralization of All Graduate Records Begun

ACTIVITIES of the new Alumni Federation are already well under way with the appointment of George I. McKelvey, '30, formerly executive secretary of the Associated Alumni, as executive secretary, and the establishment of a central office in Todd Union.

Record Centralization Started

Additional space was made available in Todd, and the centralization of alumni and alumnae records and address lists has been started, and plans organized for the direction of the Alumni-Alumnae Fund.

A committee of the Associated Alumni is considering qualified candidates for the position of executive secretary to replace McKelvey. Alumni quarters in Todd Union now include offices of the Federation's executive secretary, the Alumni Fund Office, and the office of the executive secretary of the Associated Alumni.

Mrs. Van de Walle Appointed

Fundamental to the Federation's operation and services to its constituent organizations is the establishment of the central Alumni Records Office under supervision of the newly-appointed alumni recorder, Mildred Smeed Van de Walle, '22. Existing records from the three alumni offices are being verified and centralized, and biographical information is being collected.

Similarly, address lists are being consolidated and corrected to eliminate duplication of names of persons who attended more than one college of the University.

Questionnaires have already been mailed to all alumni as the first step in a continuing operation to keep biographical records up to date. Heretofore requests for statistical information have often been impossible to answer because of a lack of central information.

Existing Chapters Continue

The Federation's central address files and addressing machinery will provide a service for the alumni offices and the alumni classes and clubs as well as for the other departments of the University.

Existing alumni and alumnae groups will continue their independent activities under the new federation set-up, with the federation coordinating undertakings that pertain to more than one school or college. Chief among such activities is the annual Alumni-Alumnae Fund, in which a continuity of staff work will be provided that has not been possible in the past.

New Regional Groups Planned

Another important function of the Federation will be organizing and working with new regional alumni chapters in various parts of the country, and stimulating and strengthening those already in existence. The Federation office also will be responsible for the preparation and publication of the Alumni-Alumnae Review, in collaboration with the executive secretaries of the graduate organizations of the individual schools and colleges and with the University's Office of Public Information.
Alumnae Committee Establishes Regional Scholarship; Candidates Sought for New $2,400 Award

THE Scholarship Committee of the Alumnae Association, under the chairmanship of Dr. Ruth Oakley, has established a new Alumnae Regional Scholarship to be competitive among regional chapters.

This award, amounting to $600 a year for four years, will be granted each fall to an entering freshman at the Women's College. Only girls who reside in one of the alumnae regional areas will be eligible (Boston, Buffalo, Chicago, Cleveland, Detroit, Ithaca, Los Angeles, New York, Philadelphia, Schenectady, Syracuse, Washington). Criteria for the award will be academic achievement and aptitude, character, personality, and participation in high school and community activities.

Regional chapters will act as liaison between local high schools and the University. They will publicize the award in the schools, solicit and interview applicants, and recommend a candidate for the scholarship to the Alumnae Association Scholarship Committee which will choose the final recipient, subject to the approval of the Women's College Scholarship Committee.

The scholarship, which was originally recommended by Jane Dibble, '48, former alumnae secretary, will be awarded for the first time this spring to a girl entering in the class of 1956. Prospective students who are eligible should make applications with their local UR Alumnae Chapters or contact the University. The Scholarship Committee urges alumnae and alumni to contact prospective students who may be eligible.

Members of the Scholarship Committee are: Dr. Ruth P. Oakley, '37; Miss Beulah Fuller, '08; Miss Anna Morrow, '32; Mrs. Bessie Pettis West, '07; Dr. Isabel K. Wallace, '16; Mrs. Caro Spencer, '27, and Mary Elizabeth Stewart, '48.

Successful Fall Festival, Christmas Buffet Presented

Two major events on the year's program of the Alumnae Association were the Fall Festival on November 14, and the Christmas Candlelight Buffet Supper and Musicale on December 9.

Family night was emphasized at the Fall Festival under the chairmanship of Bethyne Pink Thomas, '43, with the supper and bazaar presented by the alumnae classes of '22, '24, '43, '44 and the various sorority alumnae chapters. The booths featured children's toys, Christmas cards, wrappings, and decorations, home-made candy, and hand-sewn articles. Special entertainment for children included movies and games.

The Christmas Candlelight Buffet Supper and Musicale under the chairmanship of Ruth Watanabe, '51, was presented in the traditional setting of candlelight and Christmas decorations. The musicale consisted of an instrumental prelude by the Women's Flute Quartet from the Eastman School of Music, a program of Christmas carols by the Women's Glee Club under the direction of Grace Trebert, and a dance interlude by Jean Foster.

Phi Beta Kappa Plans Observance of 175th Anniversary

The University of Rochester chapter of Phi Beta Kappa has conducted an active program this Fall and Winter under Goodman A. Sarachan, '18, president.

"Current Trends in American Culture" is the theme of a series of Sunday afternoon coffee hours in Cutler Union, the first of which was on November 11, when Gertrude Herdle Moore, '18, spoke on "Current Trends in American Art." Erich Leinsdorf, conductor of the Rochester Philharmonic Orchestra, spoke on American music on January 13, and American drama was the subject scheduled February 10.

On March 30, the chapter will combine the initiation of new members with observance of Phi Beta Kappa's 175th anniversary of its founding at the College of William and Mary in 1776.

An innovation this year was the formation of a Phi Beta Kappa speakers' bureau to furnish speakers to high schools, stressing scholarship and its relation to practical life. Among the speakers who agreed to take part are Mercer Brugler, '25, president of the Pfaudler Company, Dr. Albert D. Kaiser, '09, city health officer, Dr. Katherine Koller, English Department chairman, and the Rev. Harold E. Nicely, pastor of Brick Presbyterian Church.

Turners Make Book Gift

The University Library recently received a gift of more than 500 books, chiefly in the fields of German literature and history, previously belonging to the Rochester Turners, Inc. Edward P. Loeser, '28, was principally responsible for arranging with the organization's board of directors for donating the volumes to the library, where they will be a valuable addition to the collections in those fields, according to John R. Russell, University librarian.
THREE times during the University of Rochester's history, special circumstances and leaders who possessed vision and inspiration have combined to give a great forward thrust to the University's development.

Rush Rhees: 1900-1935

The first of these momentous occasions was, of course, the founding of the institution in 1850. The second was when President Rush Rhees accepted its leadership in 1900, in the firm belief that here could be developed one of America's leading universities. Through his own vision and integrity, and the confidence which he generated in others, he was able to make his dream come true, and at the time of his retirement in 1935, to leave an institution tremendously strengthened by great contributions from many friends, ready to take its place among the nation's foremost centers of higher education.

Many Great Achievements

The great achievements of his administration are known to all. From a small but sound liberal arts college of 885 students in 1921-22, he developed a true university embracing schools of music, medicine and nursing, and laid the foundations for a Graduate School and a University School each serving in its area with distinction, Rush Rhees set standards of quality of instruction and research, of close attention to the individual needs of students, of service to the community, and of sound financial management, which remain today the principles which will guide the University of Rochester toward the future goals on which it is now raising its sights.

Consolidation Period

During the 15 years of Alan Valentine's administration, a process of consolidation was undertaken in which many activities were greatly improved and the resources contributed by George Eastman and many others were put to effective use.

Now, in 1952, Rochester is on the threshold of its next great advance. Once again, a leader who can realize dreams is at the helm in the person of our new President, Cornelis W. de Kiewiet. Once again, vision, courage, high principle, abiding faith in its great destiny, and careful weighing of the critical needs which must be met in serving the community and the nation in the fateful years ahead, will launch a challenging new era of University development.

New Student Flood Soon

From 1958 on, the nation will witness a growing flood of young men and women seeking higher education. These are the war babies grown up. They are the nation's most precious asset, the potential leaders to whom must be given every opportunity to prepare for nationally essential service. The University must be ready to serve them at the highest level of effectiveness.

At this third crossroad in its onward march, the University must of necessity look ahead. Its trustees, administrative officers and faculties must ask themselves what kind of university can best serve the national interests of the next quarter-century. We must so plan today that 25 years from now we can feel pride in the service which the University has thus been enabled to provide.

OUD Created

To that end, the Office of University Development has been created and a program formulated through which Rochester may most effectively meet its historical obligation and keep its place among this country's educational leaders.

The President and trustees must define its purposes and goals, the faculties must study and recommend to them the programs that are essential to attainment of the objectives sought. Finally, an organization must be created combining alumni, alumnae, and friends of the University to obtain the new resources which are imperative if Rochester is to fulfill its destiny.

Many Committees at Work

All of these efforts are now in progress. Faculty committees are hard at work reviewing the University's entire educational program and needs. Lay committees have been appointed to assist the Office of University Development in obtaining the capital and current resources which must be found if the program is to succeed.

Basic in our philosophy is the belief that the University must direct its efforts to training the young men
and women admitted to the University to the highest potential for leadership. We are keenly aware of this responsibility to the community and nation. The burden on young people from here on will be so great that we must shirk no part of our job in preparing them better to take up the great load which they will have to shoulder.

**Earlier College Start Needed**

Practically speaking, many of us feel that we must provide opportunities for young men and women of the highest capacity to begin their college careers at an earlier age and to enable them through flexible curricula to progress as rapidly as their abilities permit. President de Kiewiet voiced this problem aptly when he called attention recently to what Henry Adams termed an appalling "waste of mind" in education.

"In most ordinary high schools a year is wasted in the lives of really bright students," President de Kiewiet said. "In colleges and universities the mortality of talent is shamefully high. Poor evaluation of a student's qualifications at entrance, indifferent advisory procedures, a stubborn myth that students must be failed in a given ratio, are responsible for an unacceptably high proportion of frustration and failure."

**Thorough Study Planned**

It is too early to say what final judgments will be made as to the areas in which the University should seek to strengthen or expand its educational services. Every facet of its program will be thoroughly studied in the effort to define the future course in a way that will assure the continued quality of instruction for which Rochester has long been known, and to help it attain the new goals it sets for itself.

The problems of the University are many, complex, and far-reaching. Certainly the most careful and immediate consideration must be given to physical needs, such as additional dormitories for men and women students in the College of Arts and Science, a new women's physical education building, dormitories and student union for the Eastman School of Music, and more adequate library facilities at the Medical School.

**Improved Faculty Salaries**

Major concerns of the development program will be efforts to improve the economic status of our faculty, to attract a larger number of the highest quality students through scholarships and fellowships, to put on a solid financial basis such outstanding programs as the doctorate in American history, to improve the student advisory system, and to make greater provision for vocational counseling and placement.

The Division of Engineering and the outstanding Institute of Optics are other areas in which much thought is being given to improving facilities and strengthening programs.

**Women's College Questions**

Other questions to be decided are how University School can better serve the community, and what should be the future direction of the Women's College. There are strong trends in women's education throughout the country in the direction of integrating men's and women's education, and greater emphasis on technical and professional training.

In view of the national manpower crisis and the need for providing women with greater educational opportunities, the University must make a decision among three possible courses for development within the College of Arts and Science:

1—Either the present system of coordinate education must be so developed that all of the college's educational opportunities are equally open to both men and women, using a single faculty as at present, or

2—A separate, self-sufficient College for Women, considerably strengthened in its own resources, must be considered, or

3—The Men's and Women's Colleges must be integrated at the River Campus, thereby gaining greatly in the efficiency of operation and enrichment of educational and social advantages for all students.

**Careful Study Needed**

The closest study is being made of all three possibilities, but it will be some time before the Faculties, Administration, and Trustees will be in a position to determine which offers the greatest promise for the future of the University.

Fortunately at this epochal stage of the University's history and of the crisis in education in our society, we have the rare combination of pressing circumstances and, in President de Kiewiet, a leader of rare vision, perception, and courage. Rochester, with the active participation of its sons and daughters, is on the march to its destiny as one of America's finest universities.

**Engineering Enrollment Increases Over 1950, Professor Conta Reports**

Enrollment of freshmen in engineering courses at the Men's College is considerably higher than in 1950, and also is proportionately ahead of the national trend.

Prof. Lewis D. Conta, chairman of the Division of Engineering, reports that 72 freshmen, 25 per cent of the first-year class, are enrolled in chemical and mechanical engineering courses, a rise of 30 per cent over last year. A total of 200 undergraduates are majoring in engineering this year.
World's Leading Nuclear Physicists Gather at River Campus

Research Experts from Three Continents Exchange Findings; Dr. Enrico Fermi Awarded Honorary Doctorate in Science

If any proof were needed of the important national and international position of the University of Rochester's Physics Department in the field of nuclear physics research and teaching, it was provided conclusively in a historic conference on meson physics held at the River Campus during the week of January 7.

Three Nobel Prize Winners

It brought to the University virtually all of the top nuclear physicists of the country, and a number from Europe, Japan, and China, including three Nobel Prize winners, from all of the important atom research centers at universities, in industry, and government installations. It was called by many the greatest gathering of the foremost men in this field ever held, and their presence was unquestionably a tribute to the work both in nuclear physics and cosmic rays at Rochester under Dr. Robert E. Marshak, the department chairman, in conjunction with the University's two machines, the 7,000,000-volt and the 250,000,000-volt cyclotrons.

Many New Research Findings

As one of the distinguished conference put it, the meeting was historic in that it came at a time when many new findings are emerging from research both with cyclotrons and cosmic rays on a whole range of new phenomena of nuclear forces, especially mesons and V-particles, which may provide answers to the vital questions on the basic structure of all matter, the atomic nucleus.

"The best conference on nuclear physics ever held, including international meetings" and "the most exciting in years" were typical of the comments of the scientists who took part. Thomas H. Johnson, the new director of research for the Atomic Energy Commission, said that the sessions gave him new energy and inspiration to go ahead with his job.

Informal Atmosphere

With no prepared papers presented, the sessions were conducted in an atmosphere of great informality as the scientists tossed questions at each other, or disputed interpretations of the significance of experimental conclusions. The meetings, as planned by Dr. Marshak, were designed to afford free exchange and discussion of information coming from the various research centers, from New England to California, and to enable the physicists to hear what their colleagues have been doing and thinking. What they learned, as Dr. Isidore I. Rabi, Nobel Prize physicist of Columbia, said, "will take them a year to assimilate before it will be possible to determine what has been achieved here; this has been a stimulating conference."

Industrial Financial Support

The conference, made possible by financial support from a group of Rochester industries, was preceded by the arrival of Dr. Enrico Fermi of the University of Chicago, generally rated as the world's greatest...
nuclear physicist, co-designer of the atom bomb and planner of the first atomic pile that resulted in the initial successful chain reaction. Dr. Fermi came to the University for a week as visiting lecturer in physics, and on the eve of the conference, was awarded an honorary Doctor of Science degree, presented by President de Kiewiet. In citing the great, Italian-born physicist for the degree, Dr. Marshak said in part:

Fermi Hailed Anew

“Moving freely from one frontier of investigation to another, Enrico Fermi has now shifted his research activities to the new and fascinating field of meson physics . . . There is no doubt, and evidence is forthcoming from some exciting experiments already performed on the new Chicago cyclotron, that he will be universally acclaimed as a leader in meson physics just as he has been acclaimed a leader in every field which he has chosen to follow in the past.”

In a public address following the ceremony on “Future Progress in Nuclear Physics,” Dr. Fermi paid special tribute to Dr. Hideki Yukawa, Japanese physicist and Nobel Laureate who attended the conference, for his postulation of the meson theory that led to actual discovery of that particle, and to Dr. Marshak, who first theorized the probable existence of the heavy meson several months before that particle was found in cosmic rays.

Oppenheimer Present

To name only a few of the other scientific greats who came to the River Campus for the conference, there were J. Robert Oppenheimer, director of the Institute for Advanced Studies, Princeton, N.J., and wartime head of the atomic bomb project; E. Paul George, brilliant young British cosmic ray physicist, who is remaining at the UK as visiting professor for three months; Rudolph Peterls, of the University of Birmingham, England, who headed England’s wartime atomic bomb project and is the chief British collaborator on U.S. atomic energy work; Hiroshi Fukuda of Japan, and C. N. Yang of China, Urner Liddell, director of the Physics Division, Office of Naval Research; Gregory Breit, Russian-born expert on uranium fission, now at Yale;

Young Cornell Official Appointed To New Post As University’s Administrative Secretary

DR. Robert H. McCambridge, formerly assistant to the president of Cornell University, joined the University of Rochester staff on January 21 in the newly-created position of administrative secretary of the University.

Dr. McCambridge, who is 30 years old, will assist President de Kiewiet, trustees and other officials in correlating various administrative activities relating to the University as a whole. He was administrative assistant to Dr. de Kiewiet when the latter was acting president of Cornell from 1949-51, and more recently has been assistant to Cornell’s new president, Deane W. Malott.

Former Navy Flyer

With his wife and two children, Christine, 5, and Kathleen, two months, Dr. McCambridge moved to Rochester on January 17. A native of Springfield, Mass., he was graduated from Rhode Island College of Education in 1942, took graduate work at Cornell after serving as an aviator in the U.S. Navy from 1942-45, received his master of science degree in education in 1947, and took his Ph.D. work from 1947-49 in residence at Cornell, where he received his doctorate last June.

While a student at Rhode Island College, he did student teaching at Manville, R.I., Junior High School, and was teacher of science and mathematics and basketball coach at Sandwich, Mass., High School in 1945-46. At Cornell he was a general teaching assistant in the School of Education in 1948, and placement counselor in the student personnel office, School of Industrial Relations, in 1949.

Committee Secretary

As assistant to the president at Cornell he also served as secretary to the president’s long-range planning committee, secretary of the University Committee on Radio, Television, and Visual Aids, and as faculty Fulbright Awards adviser.

At Rhode Island College, he was student association president, and a member of the track and tennis teams, dramatics group, and student newspaper staff. At Cornell he was president of the Graduate School Board, and was elected to Phi Delta Kappa, honorary educational organization, and Phi Kapp Phi, honorary academic society.

He served as cruiser aviator and officer in charge of a cruiser aviation unit aboard the U.S.S. Biloxi in Pacific campaigns from the invasion of Kwajalein to the Iwo Jima attack.
Cost of operating the University during the 1950-51 fiscal year was nearly $13,000,000, and it was only through gifts of funds for current purposes such as the contributions of alumni and alumnae in the annual giving program that it was possible to balance the budgets, it is shown in the annual report of Raymond L. Thompson, vice-president and treasurer.

Dependent on Outside Funds

Pledges from graduates of the various schools and colleges in the Alumni-Alumnae Fund drive last Spring amounted to $50,265.

As expenses have grown, both in the operation of the usual educational services and in the conduct of sponsored research, the University is constantly more dependent upon outside funds to meet its financial needs, Mr. Thompson stated.

"An important factor in the make-up of research contracts, which are mainly with U.S. government agencies, is their provision for reimbursement for overhead costs," he said. "Without such credits, and gifts for current use, the University could not function within its present resources except by incurring large deficits. The continuity of these contracts is necessarily indefinite, and any sudden cut-off would require serious financial readjustment."

Cost up $367,048

Cost of conducting the University's educational and auxiliary services was $12,706,309, a rise of $367,048 over the preceding year. Non-recurring capital outlay, principally for the completion of the Atomic Energy Project building at the Medical School, amounted to $271,411. The combined figures totaled $12,977,720. It is a striking comparison that this figure exceeds by $1,353,439 the $11,624,281 it cost the Rochester taxpayers last year to run the entire public school system—consisting of 10 high schools and 40 grade schools. The University, of course, is an independent, gift-supported, non-profit institution.

The principal operating deficits last year were $97,867 in the College of Arts and Science and $79,139 at Strong Memorial Hospital, teaching hospital of the Medical School. Of the latter amount, $15,000 was offset by a contribution from the Community Chest. The University's net deficit was met from unrestricted endowment income.

Dr. Bert J. Bixby Gift

The figures on Strong Memorial Hospital do not include the expense of conducting the Psychiatric Clinic, which is a separate financial operation. Value of the out-patient work in that clinic during the year is estimated at $75,000, in return for which the income received from the service was less than $10,000.

Gifts for current use during the year, including a number for research, amounted to $636,434, or 5 per cent of total income. The largest single gift was $225,837 from the estate of Dr. Bert J. Bixby of Buffalo for endowment of the Medical School for the study of diseases of the gastro-intestinal tract.

George F. Baker Trust

Additions to scholarship funds in the College of Arts and Science included a grant of $50,000 from the George F. Baker Trust of New York City, to be used for students in the Men's College. Other contributions for undergraduate scholarships aggregated $15,400. Gifts for graduate fellowships in all schools of the University came to $73,296.

Scholarships and student loans from University funds amounted to $198,534, an increase of $24,271 over the preceding year.
Total annual income in 1950-51 was derived from the following sources:

Student tuition and fees, $2,179,885, or 17.1 per cent; from endowment funds, $2,758,414, or 21.6 per cent; Strong Memorial Hospital patients and operation of Municipal Hospital, $3,491,551, or 27.4 per cent; grants-in-aid, and sponsored research, $2,389,609, or 18.7 per cent; dormitories and dining rooms, $362,747, or 4.4 per cent; auxiliary enterprises, (college bookstores, student unions, student activities, etc.) $402,047, or 3.2 per cent; gifts for current use, $636,434, or 5 per cent; miscellaneous, $368,980, or 2.9 per cent.

The University's endowment funds are divided among the schools and colleges, with unrestricted endowment funds amounting to $14,690,967, income from which is used to make up deficits in the individual divisions. The endowment of the College of Arts and Science, which embraces both the Men's and Women's Colleges, aggregates $14,364,300; Eastman School of Music, $10,770,922; School of Medicine and Strong Memorial Hospital, $19,146,115; Memorial Art Gallery, $674,429.

State College Leaders Hold Annual Meeting at UR

Presidents, chancellors and other administrative heads of some 80 colleges and universities, and directors and undergraduate representatives of student unions in New York State and Vermont were among visitors to the Rochester campus recently.

Cornell, Colgate Presidents

The college and university leaders met at the River Campus on December 7 at the annual meeting of the Association of Colleges and Universities of New York State, Deane W. Malotte, the new president of Cornell University, was a principal speaker, discussing the rising financial problems of higher education. Dr. Everett Case, president of Colgate, declared that the national military mobilization program will be felt by the colleges in lowered enrollments next Fall, and Dr. John C. Adams, president of Hofstra College and of the Association, declared that "inflation is one of our biggest enemies."

New Services Needed

"We are faced with increasing services and diminishing power with which to effect them," Dr. Adams said, "We are concerned therefore with two problems: How we can reach new legitimate avenues of money and how we can effect those economies without enabling the bulge to go any further."

University School Alumni Adopt By-laws, Elect Officers

The University School Alumni Association has adopted a set of by-laws as provided for in their constitution and elected the following officers:

President, Lloyd Seebach, '48; vice-presidents, Charlotte McKeon, '49, and Anthony Partigan, '49; secretary, Sofia D'Andreano, '49; treasurer, Louis Meisel, x '50. Named to the Association's Alumni Council were James Barry, '50; Herbert Brauer, '47; Richard Erb, '50; Kenneth Kreiser, '50; Mary Miller, '49, and Robert Sharkey, '51.
News from the Rochester alumni and alumnae regional clubs has been principally of the enthusiasm created by President de Kiewiet’s visits. A common comment has been, “He makes me wish I could go back to college and start all over again.”

Speaking before groups at Schenectady, Boston, Washington, Buffalo, Cleveland, Detroit, Syracuse, and Niagara Falls, and New York to date, Dr. de Kiewiet has emphasized the role that education can and must play in advancing the culture and stretching the manpower of the free world. He has dwelt particularly on the need for education to keep in phase with society in order to serve it well. He has pointed out that it must be the alumni who will make it possible for the private institutions to contribute their part to the effort and that the contributions must be moral and spiritual as well as material.

Other meetings are planned for Philadelphia, and Chicago.

CHICAGO

New officers of the Central Alumni Association are: George Lufkin, ’40, president; John “Tuck” Faulkner, ’43, vice-president; Roger Swett ’42, treasurer, and Robert Exter, ’35, secretary.

At press time no information was available concerning the success of the Christmas admissions tea held while Chicago was virtually snowbound.

The annual tea-sale, proceeds of which are given to the Dean’s Fund and to the Swimming Pool Fund, was held in November. Members donated many hand-made gift articles and food for the sale. Carita Cushman Schwanke, ’47, was general chairman and was assisted by Elaine Burk, ’47, Cynthia Holt, ’50, and Alice Webster, ’48.

NEW YORK

A fall luncheon, under the chairmanship of Evelyn Aultfather, was held at the Pen and Brush Club in November. Judge Libby E. Sachar of the Juvenile and Domestic Relations Court of Union County, N.J., spoke on the “University Woman’s Influence on Her Community”. Judge Sachar, an attractive and enthusiastic speaker, convinced her listeners that it is their duty as citizens to work for better government. She emphasized that woman power has not been used to full capacity. “Women have shunned politics. They have been homemakers, done charitable work and worked as volunteers, but this is not policy making. Women are not aware of their power. They could sway the policies of the world. The home should influence the government.”

Dr. Isabel Wallace, vocational counselor for Women, and Mrs. Caro Spencer, assistant director of admissions, attended from Rochester.

On the arrangements committee were Janice Miller, ’47; Laura
President de Kiewiet, who speaks four or five languages fluently, listens to French lesson on recording with Doris Urbach, (center), a senior, and Miss Rose Robyns, assistant instructor, in new foreign language laboratory which greatly speeds learning.

NIAGARA FALLS
Another highly successful admissions tea was held on January 14 with more than 75 prospective students and their guidance officers on hand to meet the area alumni and admissions representatives from the University.

First officers for the newly formed Niagara Falls Alumni-Alumnae Association include Newcomb Prozeller, '39, president; Winifred Martin Fowler, '42, vice-president, and Mary McEntee, '51, secretary-treasurer.

SCHENECTADY
A tea for prospective students was held December 28 under the chairmanship of Evelyn Meyers Currie, '45. More than 40 sub-freshmen from the Albany, Schenectady, and Troy area attended. A group of undergraduates led by Frances Young, '53, put on a skit portraying life at college. Mrs. Caro Spencer, assistant director of admissions, was a guest speaker.

On January 8 a meeting was held at which Dr. K. S. Mitton, director of the cancer clinic, Ellis Hospital, Schenectady, was the speaker.

WASHINGTON
New officers of the Association are James Phillips, '37, president; Evelyn Theis Klein, '39, vice-president, and Ethan Davis, '40, secretary-treasurer.

Lester Wilder Promoted
Lester O. Wilder, '11, dean of the Men's College since 1944 and associate professor of English since 1934, has been promoted to full professor. He received his master's degree from Harvard in 1915, and joined the Rochester faculty that year as instructor in English. He served as director of admissions from 1936-1944.

Foreign Language Fluency Enhanced, Speeded By Novel Saturation Teaching Techniques

"SATURATION FLUENCY" is a new term becoming familiar to foreign language students in the College of Arts and Science these days. It is a technique employed in the new linguistic laboratories that represent an important expansion in the University's facilities for teaching foreign languages.

What it means is overlearning or repetition of the spoken language, by means of recording machines and record players, earphone listening, monitored short wave broadcasts and voice recordings made abroad. The students are said to be enthusiastic about the new method, and Dr. Howard G. Harvey, director of the French fluency laboratory, reports that student interest has been increased and comprehension speeded.

For this year, the laboratory plan is limited to work in French at the Women's College, under Professor Harvey's direction, and in German at the Men's College under the direction of Prof. Arthur M. Hanhardt. It is expected that the program will eventually be extended to all undergraduate foreign language students.

The method, which by-passes the familiar book approach and the tedious study and recitation of individual sounds, works this way:

The students, of whom there are 10 in each laboratory section, hear phrases through earphones, repeating each, first in chorus, and then individually, producing maximum concentration on the sound of the phrases. To avoid boredom, the work is varied every 15 minutes and
from day to day. Voices of some 15 native-born French people have been recorded, which affords the pupils the opportunity to hear the many different inflections, the cadence, rhythm, and varying speech mannerisms.

Native foreign language assistants who are graduate students at the University staff the laboratories. Much of the material used was created by Professors Harvey and Hanchardt to fit the needs of each group.

After listening to the recordings, the students engage in dialogue practice and spontaneous conversation, which are recorded and played back. Remedial exercises in pronunciation are tailored to fit individual needs, and in some cases recorded on personal discs for practice at home or in the laboratory. The main emphasis is on fluent speech as a means of communication on the everyday level.

Although other colleges are adopting the method, they do not have the equipment, individuality, or homework discs employed at Rochester, it is said.

Faculty Notes

Dr. W. Albert Noyes, Jr., Chemistry Department chairman, has succeeded famed Dr. Harold C. Urey, one of the world's greatest nuclear physicists, as a member of the National Commission for the United Nations Educational, Scientific and Cultural Organizations (UNESCO).

Composed of 100 leaders in education, science, and the arts, the committee advises the government on affairs related to UNESCO and is responsible for the organization's program in this country.

Formerly president of the American Chemical Society, and now editor of its Journal, Dr. Noyes participated in the London conference after the war that organized plans for UNESCO. Since then he has served as chairman of the Naval Research Advisory Committee and of the Division of Chemical Technology, National Research Council, as a member of the Chemistry Panel of the Atomic Energy Commission, and adviser to the Office of Civil Defense Planning to study technological aspects of radiological defense. He was appointed last year by the Army as chief scientific adviser to Maj. Gen. Anthony C. McAuliffe, chief of the U.S. Chemical Corps.

Dr. Glyndon G. Van Deusen, '25, professor of history, has been in New Zealand as recipient of a Fulbright award under which he was a visiting lecturer at the University of Otago, Dunedin, N.Z. With his wife and two children, he left there January 10 for Australia, and thence to Singapore, and by way of Ceylon and Suez to Italy. They planned a tour of the Low Countries, Germany and Austria, with a month's visit in Salzburg. Professor Van Deusen is to conduct a seminar in American history. They planned to return to Rochester in June after a tour of Southern Europe.

The Fulbright awards are made by the U.S. State Department and are designed to develop and strengthen good relations between the United States and other nations.

CLASSNOTES
College for Men

1901
THE REV. JOHN B. WHITEMAN plans to retire from the pulpit and as dean of Franklin County clergymen in Greenfield, Mass. He has been rector of the church there for 44 years.

1903
JUSTICE WILLIAM F. LOVE retired in January from the Supreme Court of the State of New York. At a banquet last May of the Theta Delts of Rochester and vicinity he was given a scroll signifying that 135 of his Chi chapter and Western New York brothers had contributed approximately $6,000 to a fund to be set up in the Educational Foundation and under his name.

1905
ARTHUR L. STEWART, vice-president of the Gleason Works in Rochester, has been elected vice-chairman of the board.

AL SIGL observed his 21st milestone as Times-Union newscaster on January 2. "Old Gravel Voice" as Al calls himself was given 21 roses from his associates at Station WHEC.

1906
EDGAR J. FISHER, Carter Glass professor of government at Sweet Briar College, participated in a panel discussion at the Conference on World Order in Rochester.

1910
WILLIAM ROY VALLANCE, a member of the U.S. State Department, was the University's official delegate to the celebration of the 400th anniversary of San Marcos University at Lima, Peru, in December. He also attended a conference in Montevideo, Uruguay, of the Inter-American Bar Association of which he is secretary general.

1913
JAMES M. SPINNING, superintendent of schools in Rochester, in addressing the Rochester public school teachers in September, praised American public education for doing a "heroic job".

1919
KENNETH B. KEATING, his wife and daughter, Judy, spent Christmas in Italy. Representative Keating was a delegate at the European Consultative Assembly in Paris.

1920
GEORGE D. NEWTON assumed the posts of Livingston County judge and surrogate and judge of Children's Court in December.

LOUIS H. BEAN, Agriculture Department economist, gave an advance look at 1952 during the "Capital Memo" program over WHEC on December 30. Mr. Bean also spoke in Rochester on December 12.

J. R. COMINSKY, executive vice-president and treasurer of "The Satur-
day Review” has become its new publisher. Jake Cominsky has boosted the magazine’s circulation to its present all-time high of better than 100,000 and broadened its coverage to include arts, travel, records, television, the theater and films.

1921

DWIGHT VANDEVATE, works manager of Gleason Works in Rochester, was elected a vice-president of the company.

WILLIAM J. YOUDEN, a chemist with the National Bureau of Standards, is the author of a new book, “Statistics for Chemists”. His book is designed for chemists and chemical engineers in industrial and academic circles. He recently spoke before the Quality Control Group of the Industrial Management Council on “Interpretation of Data”.

1924

BILL LAUMAN spent a few days in Rochester in October and returned to Turkey in December. He is executive secretary of the U.S. Educational Commission in Ankara.

1925

JAMES A. McCONNELL, previously a technical engineer has been named assistant chief engineer of the Rochester Gas & Electric Corp.

1926

1927

JUSTIN J. DOYLE has been elected president of the Automobile Club of Rochester.

1928

KARL F. GOECKEL was installed as president of the Rochester Motor Carriers’ Association in December.

With a reception in its offices, John Van Voorhis’ Sons, Rochester’s oldest law firm, observed its 100th anniversary and embarked under its new name of Fix & MacCameron. MEYER FIX became associated with John Van Voorhis’ Sons in 1931.

1929

DR. HORACE J. GROVER has been named supervisor of research on fatigue and structural analysis at the Battelle Institute, Columbus, Ohio. He has served on the Committee on Corrosion Fatigue of the National Advisory Committee for Aeronautics.

1930

DR. CHARLES F. GOSNELL of Albany, New York State librarian and assistant commissioner of education, was in Brazil during the month of October as U.S. delegate to the United Nations Educational, Scientific and Cultural Organization Conference on Library Service in Latin America. After the conference, he visited libraries in Sao Paulo, Curitiba, Bauru, Rio de Janeiro, Belen, Caracas, Venezuela, and San Juan, Puerto Rico. He also served as representative of the Library of Congress.

1931

JOSEPH C. WILSON is the new secretary of the Rochester Chamber of Commerce. He formerly was first vice-president.

1932

DR. LOUIS N. KERSTEIN has been appointed chief of professional services for the Rochester Veterans Administration Office.

1933

DR. RICHARD FEINBERG has been named executive vice-president and dean of the Northern Illinois College of Optometry. Dr. and Mrs. Feinberg (the former Elmore Appelbaum, ’35) and their two sons are now residing in Chicago.

1934

Married: DR. PINCUS SOBIE and Agnes Rosen on December 16. Mrs. Sobie is a graduate of New York University.

1935

BARTHOLOMEW J. CONTA is now professor of mechanical engineering at Cornell University.

1936

DR. RICHARD FEINBERG and his wife, Dr. Agnes Feinberg, are expecting their second child in January.

1939

Sons in 1931. 4Y2.

Van Voorhis' Sons, Rochester's oldest necessary and embarked under its new name

Tru Thermometer & Cutlery Division of the Germanow-Simon Machine Co. of Rochester. His address is 17 Beach Rd., Lynn, Mass.

Married: JOHN BERNARD DE MERS and Alice Jean Udella on November 10.

BILL BAXTER has been appointed to the newly created position of assistant deputy county legal adviser and assigned to the Special Tax Bureau to handle the 2 per cent sales tax and business privilege tax. Bill will handle legal questions arising from administration of the sales tax and the business privilege tax.

Born: To Mr. and Mrs. RICHARD SECREST, a son, on October 31.

1944

Born: To DAVID HUBBS and Patricia Ross Hubbs, '50, a daughter, Patricia Lynn, in August.

Married: RICHARD G. SAUNDERS and Marilynn Ann Welch on October 31 in Massillon, Ohio.

Married: EDWARD C. AKERLY and Celia Doolittle of Lawrence, Kan. Mr. and Mrs. Akerly are staff members of the National Foundation of Infantile Paralysis of Kansas City, Mo.

DR. WILLIAM C. CACCAMISE has left the United States to be the eye surgeon at the Patna Catholic Missionary Hospital in Patna, India. He is on leave of absence from his fellowship with a Cleveland clinic.

Married: ALFRED O. GINKEL and Jean DeLand Henderson on November 24. Mrs. Ginkel is a graduate of Skidmore College. They are living at 54 Girton Pl., Rochester.

Born: To Mr. and Mrs. WARREN HEARD, a son, on December 30.

Married: JOSEPH J. LIPPER and Donna Irene Kernan on December 30, in Sacramento, Calif.

Married: LT. JAMES M. MURPHY and Mary Winter on July 28 in Jacksonvile, Fla. Jim left on the USS Tarawa in November, to be gone until May 1.

SAMUEL YOUNG JR. has joined the technical staff of the Whiting Research Laboratories of Standard Oil Company in Indiana. He was formerly associated with Cities Service Oil Co.

1945

Born: To MR. AND MRS. EDWARD A. MASON, a son, Thomas Edward, on March 22.

Engaged: IRVING R. ABEL and Marilyn Jacobs.

1946

Married: RICHARD S. GORDON and EMILY CONOVER EVARTS, on September 8 in Cambridge, Mass. Mrs. Gordon is a graduate of Bryn Mawr College and is doing graduate work in the Harvard-Radcliffe Biology Department. Mr. and Mrs. Gordon are living in Cambridge.

Born: To the REV. AND MRS. F. H. HOFFMANN, a daughter, Charon Beth, on October 8.

DR. ARTHUR J. GROSS's new address is 365 Clinton Ave., Brooklyn 5, N.Y.

Married: MARK E. STEIDLITZ and Phyllis Potter of Charleston, W. Va. Mark is a research engineer in an atomic lab for North American Aviation. Their address is 5621 Lovelie St., Long Beach 11, Calif.

1947

Married: ARTHUR L. DI CESARE and Rose Marie Mastine on October 6.

ART FRACKENPOHL's work, "A Child This Day Is Born" was performed December 16 by the Crane Department of Music at Potsdam State Teachers College.

THOMAS N. BONNER was appointed dean of faculty at William Woods College, Fulton, Mo. He received his Ph.D. in history from Northwestern University last fall.

WARREN P. GANTER is with Standard Cable Corp. His address is c/o Standard Cable Corporation, Chickasha, Okla.

Born: To Mr. and Mrs. DONALD J. HOWE, a son, Philip Warner, on November 12. The Howes have a daughter 2½. They are living in their new home at 141 South Prospect St., Spencerport, N.Y.

Engaged: KENNETH L. BAKER and Grace N. Gillespie. A September wedding is planned.

1948

Born: To GEORGE A. BROWN and Louise Madden Brown, '49, a son, Laurence George, on July 12. George is working for Merck and Co. in Rahway, N.J. Their home is in Plainfield, N.J.

Born: To DONALD FISHER and Betty Lou Babcock Fisher, '50, a son, James Babcock, on October 2. They are living at 135 Commodore Pkwy., Rochester.

Engaged: GEORGE R. MORRISON and Bonnie Oman. George is a second year medical student at the UR Medical School.

PETE WOODAMS has been called back to active duty in the Navy and has gone to the west coast.

GENE MOSCARET left for Pasadena, Calif., where he is with the Consolidated Engineering Company.

1949

Engaged: RICHARD L. ALTTER and Joan Marie Mogge.

DICK BRADY attended a US Bureau of Standards symposium on optical image calibration in Washington and met VANCE CARPENTER, who is now doing research for American Optical Company in Stamford, Conn.

We were glad to hear from BUD COHEN who is studying at Harvard Law School. He mentioned in his letter seeing AL LEVIN, CLARK BARRETT, and ARNIE CIACCIA who are also studying law there. Bud said it was like old home week running into DON MARSTON, CHARLIE ADLER, and MICKEY KELLER in Cambridge. Bud's address is 107 Ames Hall, Cambridge, Mass.

Engaged: NORMAN W. CONNER and Mariann Werth.

Married: J. WILLIAM FISHER and Athalene Everman on November 10. Mrs. Fisher is a graduate of Alfred University.

CHARLES GILL is a project engineer for Hawkeye in Rochester.

Engaged: ALAN L. LEWIS and Sarah Leah Horwitz, '51.

Born: To SCOTT NORRIS and Pat Costello Norris, '51, a son, Gregory Scott, on October 26. Scotty's address is USS Leray Wilson (DE 414), c/o F.P.O. San Diego, Calif.

HUGH OUTTERSON is a third year student at Colgate-Rochester Divinity School. He is currently serving as a minister of the Barre Center Presbyterian Church at Barre Center, N.Y.

1950

Married: JAMES C. CLARK and Barbara E. Wehle on August 4. Mrs. Clark is a graduate of Wellesley College.

Married: NORMAN H. DAVIDSON JR. and Carolyn Varney on December 23. Norm is employed as rang-
er naturalist with the U.S. National Park Service.

Married: DONALD L. HALL and Joan Carolyn Pickles on December 1. Mr. and Mrs. Hall are living in Buffalo.

Born: To ROGER MOORE and Jonni Adams Moore, '50, a daughter, Robin, on November 24. Their address is 13 Springwood Court, Kenmore, N.Y. HOWIE SMITH and Ruth Carroll Smith, '49, are living at 20125 Votra Beck Court, Detroit 19, Mich.

PAUL J. SMITH won the Lillian Fairchild Award for 1951 for his poetic drama "Eight and Twenty Mansions". His play was produced last May by Stagers.

Married: RICHARD L. WHITE and Ann Rita Flanigan on Feb. 2.

Engaged: WILLIAM U. PULSIFER and Barbara T. Rice.

1951

Married: EDWARD J. CARNEY and Mary Ann Link on December 22. MARIO SPARAGANA won a state scholarship in medicine and dentistry. Mario is a first year student at the UR Medical School.

Married: RICHARD D. AND MRS. OLIVER BEARDMORE, a son, Roger, on June 21. They are living at 135 Cambridge Blvd., Buffalo, N.Y.

Married: ROBERT W. CARPENTER and Jane Dunning. Mrs. Carpenter is a graduate of Wilson College.

Engaged: JACK R. CAULKINS and Marion Anne Bayer.

Engaged: RICHARD C. DURKEE and Carmeleta Reichl. Miss Reichl is a graduate of the Eastman School of Music.

Married: RALPH J. GOULDS and Virginia E. Castillo on October 13. Their address is 313 Hawthorn St., San Diego, Cal.

Married: ENSIGN FRANCIS E. GREENE and Harriet A. Dorsey on December 29. Mrs. Greene is a graduate of Wells College. They are living in Norfolk, Va.

Married: BOB HENDRICKS and Carole Axworthy, '51, last summer. Bob is a graduate student in chemistry at Brown University. They are living at 94 Angell St., Providence 6, R.I.

Married: EDWARD KENNEDY and Elizabeth A. Stowell on December 29. They are residing at 80 Thurston Rd., Rochester.

Engaged: MARK F. ORTELEE and Donna Jean Smith. Mark is a student at Albany Medical School. A June wedding is planned.

Married: CARL L. WERNER and Mary Louise Beach in January.

Married: ENSIGN DONALD G. WOBSEER and Mary Ann Biel on December 29. They are living in Norfolk, Va.

GRADUATE SCHOOL

1942

DAVID WILDER is with the American University of Beirut, Beirut, Lebanon.

1939

DR. LAWRENCE E. YOUNG, associate professor at the UR Medical School, was elected president of the school's Alumni Association.

1945

DR. DAVID T. FITZELLE's snapshot of the Golden Gate Bridge won an award in the 13th annual Newspaper National Snapshot Contest. Dr. Fitzelle is a resident in medicine at Geneseo Hospital in Rochester.

1946

Married: DR. ROBERT B. KING and Molly Ann Gibbs on August 25. Mrs. King is a graduate of Mt. Holyoke College. The Kings are living at 9033 Wrenwood Lane, Audubon Pk., Brentwood, Mo.

MEDICAL SCHOOL

1950

Married: GERALD R. PATTERSON and Emily Frances Nelson on September 22. Mrs. Patterson is a graduate of the Park Avenue Hospital School of Nursing in Rochester.

1951

DAVID H. BAKER is a special student at Colgate-Rochester Divinity School. He is serving as assistant at St. John's Episcopal Church, Clyde, N.Y. and St. Stephen's Episcopal Church, Wolcott, N.Y. The Bakers have two children.

Married: WILLIAM C. LINDQUIST and Deirdre Lawler on November 8.

HELMUT H. RIEMER is a first-year student at Colgate-Rochester Divinity School. He is serving as minister of the Rushville Congregational Church, Rushville, N.Y.

REINHART SCHALIN is also a first-year student at Colgate-Rochester. He is a student assistant at St. Paul's Evangelical and Reformed Church in Rochester. The Schalins have one child.

CLASSNOTES

1912

MARGUERITE CASTLE opened her home for the annual Christmas luncheon on December 29. Fifteen classmates were present.

In Memoriam

The Rev. Elmer G. Barnum, '96, member of Phi Beta Kappa, died September 5 at his home in Spotylvania County, Va. He was 82 years old. The Rev. Mr. Barnum went to Virginia in 1909 and served as pastor of seven Baptist churches there before his retirement some 15 years ago. At one time he served six of the churches simultaneously. He also taught in Chancellor High School there and served as its principal for 12 years. Surviving are his wife, Miss Mildred Barnum, one time he served six of the churches of even Baptist churches there before R. C. Barnum of Lockport, N.Y. Harvard, '04, member of Alpha Delta Phi, died October 26. They are living in Coronado, Calif.

The Rev. Elmer G. Barnum, '96, member of Phi Beta Kappa, died September 5 at his home in Spotsylvania County, Va. He was 82 years old. The Rev. Mr. Barnum went to Virginia in 1909 and served as pastor of seven Baptist churches there before his retirement some 15 years ago. At one time he served six of the churches simultaneously. He also taught in Chancellor High School there and served as its principal for 12 years. Surviving are his wife, Miss Mildred Barnum, two sisters, Mrs. Laura Parrish and Mrs. Edith B. Jacobus and a brother, James.

JOHN M. HOEFFLIN JR., '14, died November 14 in Rochester. He had been an accountant and auditor in U.S. Army ordnance offices and arsenals from 1917 until 1926 when he entered business in Rochester.

Frederick S. Holbrook, '03, LL.B., New York University, '04, member of Theta Delta Chi, died October 30. He was 72 years old. Mr. Holbrook retired from his law practice in 1949. He served as assistant district attorney of Monroe County from 1920 to 1932 and for many years was active in civic and fraternal organizations in Spencerport, where he lived, and Rochester, where he had his law office. His son, Willard W. Holbrook, and three grandchildren survive.

Kenneth B. Kellogg, '32, died December 6, 1950 after an illness of 10 years. His wife and daughter survive.

William P. Munger, '09, died September 16 in Falls Church, Va. He had lived in Binghamton, N.Y. for many years. His wife, Mary, survives.

George H. Parmele, '89, member of Delta Kappa Epsilon, died December 28. He was 84 years old. He had been associated with the Lawyers Cooperative Publishing Company for 59 years and was editor-in-chief for 16 years until 1945. Admitted to the bar in 1892, he joined the publishing firm three years later. Until three years ago, Mr. Parmele reviewed all the decisions of the courts of last resort in the United States to determine which should be included in the American Law Reports and was considered one of the foremost law editors in the country. Surviving are his wife, a daughter, a son, a sister and three grandchildren.

Elwood B. Smith, '97, member of Psi Upsilon, died October 14. He formerly was assistant district attorney of Erie County, then entered manufacturing.

Howard Steitz, '23, member of Alpha Delta Phi, died October 26. He had practiced architecture in New York City.

Blair S. Wilcox, '14, died October 19, 1950.

College for Women
